The mission of PSU Central Library web site is to support the University's programs of research, teaching and service by providing access to information resources to meet the needs of students, faculty and staff of the University, insofar as possible.

PSU Central Library web site will establish an informative, attractive and easily navigated presence on the World Wide Web, as determined by examining peer sites and user needs, through which the Libraries can:

- provide information to current and potential clients on and off-campus about the policies, services, resources and outreach of the University Library
- offer information services that support University academic programs, both on and off-campus, to University faculty, staff and students.
- Serve as a gateway for on and off-campus users to selected Internet resources which support University academic programs.
- foster communication between the Library and clients.
