

The Task for Students

1. After learning about mind mapping, students take notes in a mind map/pattern style during weeks 3-5. They then select their **10 best samples** and hand in photocopies of them in a clear plastic folder by the set deadline. [Part 1]
2. Over weeks 7-8, students try their hand at the Cornell Method of Note Taking in English, Math, PDS and computer classes. They then select their **10 best samples** and hand in photocopies of them in a clear plastic folder by the set deadline. [Part 2]
3. When all notes are returned, students review their progress and note taking preferences during class time in Week 10. [Part 3]
